## **Description**

The Cambium Networks N800082D009A, also known as the PTP 820 2' ANT, is a high-performance antenna designed for demanding applications requiring robust RF connectivity. Operating within the 71-86 GHz frequency range, this antenna is engineered for optimal performance with a peak gain of 50.0 dBi and a VSWR of less than 1.5:1, ensuring efficient signal transmission and reception. Its compact design, measuring 660 x 307 x 252 x 45 x 289 mm and weighing 8 kg, makes it suitable for various installations, including those in challenging environments, thanks to its wide operational temperature range.

This antenna is ideal for service providers, enterprises, and governmental organisations looking to establish reliable communication networks over extensive distances, even across rugged terrains. Its linear polarisation and superior front-to-back ratio of over 69 dB enhance signal clarity and reduce interference, making it a perfect choice for...
