

Blackhawk 4G Omni High Gain Antenna, 698 to 2700 MHz, N Female

SKU: ANT-BH-OM-204
MPN: VCOL-6927-6.N2
Barcode: 9337692000447

Description

Blackhawk wideband omnidirectional antennas provide high gain across the full cellular band 700 to 2700 MHz regardless of mounting direction, allowing quick and easy installation with no technical know-how required. The antenna provides exceptional omnidirectional performance on almost all mobile networks globally.

The antenna provides a 6 dBi gain across the 4G-5G low and mid-bands, the ideal gain figure for areas with weak mobile signal.

The true wideband performance has been achieved through a clever engineering design utilising multi-sized collinear radiators and microwave-grade combiners, demonstrating consistently high gain with exceptional azimuthal stability.

The Blackhawk Wideband Omni Antenna provides an ideal solution for 4G-5G voice and data applications. With the implementation of new 4G and 5G frequencies across a broad range of radio spectrum, the use of a wideband antenna is necessary to see the full functionality of LTE-Advanced and 5G networks.

This antenna is ideal for use in rural and regional areas with marginal mobile network coverage.

Physical Specification

Subtype:	Collinear	Dimensions:	680 x 63 x 63
Input Ports:	1	Materials:	Polyvinyl Chloride (PVC)
MIMO:	1x1 SISO	Mounting:	Pole Clamp 30 to 52 mm
Min. Operating Temperature:	-40 °C	Weight:	1.9 kg
Max. Operating Temperature:	65 °C	Compliance/Certifications:	ISO 9001 Quality Management RoHS
