

Cambium PMP 450 17 dBi 5 GHz Sector Antenna, 90 degree

MPN: 85009324001

Description

Cambium's PMP 450 connectorised access point requires high performance sector antennas to achieve its headline throughputs.

Cambium offer two MIMO sector antennas that have been designed for seamless installation alongside the PMP 450 AP. The two models have the same peak gain but offer 60° and 90° azimuth beamwidths to meet the two most commonly required coverage footprints and ABAB / ABCABC frequency allocations.

The 5 GHz Access Point 60 and 90 degree sector antennas are specifically designed for use with the 5 GHz PMP 450 platform of products. As a result of their consistent front-to-back ratio in combination with power control and high gain, these antennas deliver optimised performance, including maximised spectral efficiency and easy installation.

Cambium Networks

Cambium Networks enables service providers; enterprises; governmental and military agencies; oil, gas and utility companies; Internet service providers; and public safety organizations to build powerful communications networks, reach users from 200 kilometers across mountain tops down to their devices, and intelligently manage their business Wi-Fi infrastructure through end-to-end network ...
