Description

APAC's Dual-Axle Alloy Modular Trailer is part of the company's AMT Platform, a mounting system built from interchangeable modules that allows simple reconfiguration and redeployment.

This is a Trailer Base Chassis, which can be thought of as the base building block from which other modules and subsystems are attached. It is a Dual-Axle Trailer, which provides a longer deck measuring 3.0 metres in length, but maintaining the same 1.6 metre deck width as the Single-Axle Trailer.
