Description

APAC's Single-Axle Alloy Modular Trailer is part of the company's AMT Platform, a mounting system built from interchangeable modules that allows simple reconfiguration and redeployment.

This is a Trailer Base Chassis, which can be thought of as the base building block from which other modules and subsystems are attached. It is a Single-Axle Trailer, which provides a deck length of 2.6 m and width of 1.6 metres. This model is shorter than the dual-axle trailer by 400 mm.

The Chassis is manufactured in Queensland using heavy gauge medium-structural grade aluminium.
