

Starlink Standard Actuated Dish, Gen 2 (REV3)

MPN: UTA-212

Description

Starlink's Generation 2 User Terminal, known as the Standard Actuated Dish, or "Rectangular Dishy" is a satellite terminal provided by Starlink as the main user equipment between November 2021 and late 2023. The unit is referred to as the Generation 2 (Rev3) UT. Generation 1 (Rev1 & Rev2) refer to the "Round Dishy". Depending on when the UT was manufactured it may have a sub-version of rev3_proto0, rev3_proto1, or rev3_proto2.

The antenna unit UTA-212 connects to its corresponding router UTR-211. Specification here refers to the UTA-212 only.

In general, the Starlink Gen2 User Terminal is a satellite transceiver which uses digital beamformers and an Electronic Steerable Antenna to track and maintain connectivity with LEO satellites as they move overhead. Gen2 uses motors to adjust azimuth and elevation to position the phased array orthogonally (ideally 90°) to the direction of the satellite and therefore maximising the effective antenna ...

Starlink, initiated by US company SpaceX in January 2015, is a satellite network project aimed at providing satellite internet connectivity. The project's primary objective is to deliver broadband services globally, particularly to underserved areas of the planet. Starlink's constellation comprises thousands of mass-produced small satellites, orbiting in low Earth orbit (LEO), working in ...
