

Taoglas GA.110 Wideband 4G-5G Magnetic Whip Antenna

SKU: ANT-TG-00008

MPN: GA.110.101111

Description

The GA.110 magnetic ultra-wideband cellular antenna delivers stable high omni-directional gain and efficiencies across all common 3G, 4G, and 5G cellular bands from 700 MHz to 3.5 GHz.

This high performing antenna can be used for all cellular devices and will not require changing antennas when deploying from country to country or technology to technology like 3G to 4G. Being magnetic mount it is designed to be mounted on a ground plane for optimal performance.

A reliable return loss of <10 dB when mounted on a metal plate ensures it complies with the industry standards set by module makers and networks worldwide. Taoglas recommends using the antenna with 1 m cable length or less and can provide customised connectors and cable lengths upon customer requirements.
