SKU: ACC-PT-00391

Barcode: 9337692004568

Description

The VHT-6938-2 is an economical terminal antenna covering a wide range of 4G LTE and 5G NR frequencies between 700 and 3800 MHz. Most notably the antenna covers all common 3G and 4G bands, along with n78 (3500 MHz) used in most 5G networks across the globe.

Designed for terminals and routers, the antenna offers an articulated SMA connector for flexible positioning and a sleek profile for low visual impact. The antenna demonstrates stable omnidirectional performance with 2 to 3 dBi gain across the bands.
