Description

The Powertec VPA-6940-7.432 antenna is a versatile panel antenna designed for outdoor applications, supporting a wide frequency range from 698 MHz to 4000 MHz. This antenna is ideal for enhancing wireless communication systems, providing stable connectivity across multiple bands, which makes it suitable for telecommunications, broadcasting, and data transmission applications. Its vertical polarisation and robust gain performance, ranging from 5.5 dBi to 8.0 dBi, ensure efficient signal propagation and reception, even in challenging environments.

Constructed from durable materials such as aluminium and ABS plastic, the antenna is designed to withstand harsh weather conditions, operating effectively between -40 °C and 65 °C. Its compact dimensions (180x158x60 mm) and lightweight design (0.4 kg) make it easy to install, either on poles with diameters between 30 mm and 52 mm or other mounting structures. The antenna's low passive...
