SKU: ANT-BH-YG-LOG-LPDA-10

MPN: LLP-6940-12.N2

Description

The Powertec 4G-5G LPDA Antenna is designed to enhance mobile network connectivity across a wide frequency range of 698 to 4000 MHz. This antenna is ideal for boosting 3G, 4G, and 5G signals, making it an excellent choice for areas with poor cellular reception. Its robust construction and aluminium build ensure durability, even in harsh environmental conditions, making it suitable for outdoor installations. The antenna's log periodic dipole array design allows for wideband performance, providing consistent high gain across various frequency bands. This ensures efficient transmission and reception of signals, enhancing data speeds and call quality.

Equipped with a peak gain of up to 11.5 dBi and a vertical polarisation, the antenna efficiently focuses signal strength towards the cell tower, improving overall network performance. Its compatibility with a range of frequencies makes it versatile, supporting multiple network providers and...
