Description

The PSF-402 Patch Cable, featuring a 4.3-10 Male to SMA Male configuration, is a high-performance RF cable designed by Powertec, part number CA-R402-431SA1.050. This 50 cm cable is part of the PSF-402 series, known for its 0.141" semi-flexible low-loss coaxial design, and is equipped with a 4.2 mm bright blue outer jacket. It supports frequencies up to 34 GHz, making it ideal for efficient RF component interconnections.

This cable stands out for its hand-formable nature, excellent shielding, and very low Passive Intermodulation (PIM), thanks to its tin-soaked copper braid that provides nearly 100% RF shielding. The malleable jacket reduces the risk of solder joint failures, allowing for bends immediately behind the fillet. Available in various colours, it aids in the easy identification of radio chains.

The PSF-402 Patch Cable is built to endure over 500 mating cycles and operates effectively within a frequency range of 0 to 6 GHz. It...
