## Description

The PSF-402 Patch Cable, part number CA-R402-432SA1.050, is a high-performance RF cable developed by Powertec. This cable features a PSF-402 type, 0.141" semi-flexible design, offering a balance of performance and cost efficiency. With a bright blue 4.2 mm outer jacket, it supports frequencies up to 34 GHz, making it ideal for component interconnections.

The cable's structure includes a tin-soaked copper braid, providing nearly 100% RF shielding, and a malleable outer jacket to prevent solder joint failures, allowing for bends directly behind the fillet. It measures 50 cm in length and weighs 63 grams. The patch cable is designed to endure over 500 mating cycles within an operating frequency range of 0 GHz to 6 GHz.

Connectivity is provided by a 4.3-10 Female connector on one end and an SMA Male connector on the other, both featuring straight body shapes and free-hanging mounting styles. The cable offers a VSWR of  $\leq 1.5:1$  at 6000 MHz...
