Nextivity CEL-FI GO G51 Stationary Repeater

SKU: RPR-CF-00716
MPN: G51–LE–003

Description

Following the technological evolution of the Cel-Fi G41, the G51 is next in the series, providing all the brilliance of the G41 with the addition of mid-band 5G. G51 automatically scans and boosts the entire channel width of 5G 3500 MHz, which is the major global 5G band known as n78, along with boosting a 4G band to provide long range connectivity.

G51 is essential for any tech professional, enterprise, or industrial environment looking to leverage the low latency and ultra-fast data performance that 5G brings. Unlike complicated "Private 5G" networks or DAS which can take 6-12 months to implement, G51 can be installed in as little as a few hours. The unit identifies and locks on to the network operator's 5G network, and can be connected to one or many antennas distributed throughout the building to provide seamless, strong voice and data connectivity.

Cel-Fi G51 is a very straight forward device, it has a single input RF connector which connects to a roof-mounted (donor) antenna, and a single output RF connector which connects to an indoor (service) antenna. Powertec provide a range of 5G-compatible antennas that have been laboratory verified for best performance on n78 5G.

The output power of G51 is +20 dBm for most bands. It's important to be mindful that while the stated output power for n78 is +27 dBm, the larger 100 MHz channel width (up to 5x

NEXTIVITY

Nextivity

Nextivity, Inc. develops and sells in-building cellular coverage technology products and solutions. The Company helps wireless subscribers and increases radio frequency network capacity for mobile network operators. Nextivity operates in the State of California.

Nextivity is best known for its Cel-Fi range of mobile repeater solutions which provide low cost improved in-building coverage solutions.

RF Specification

Simultaneous Bands:	2	Relay Bandwidth:	120 MHz
Downlink Max. Gain:	100 dB	Uplink Max. Gain:	100 dB
Supported Technologies:	4G LTE, 5G NR		

Supported Bands

Frequency Band	Duplex Method	MIMO	Downlink Output Power	Uplink Output Power	Max. Channel Width	Downlink Start Frequency	Downlink Stop Frequency	Uplink Start Frequency	Uplink Stop Frequency
