

Tongyu 4G-5G Dual Beam Dual Polarisation Sector Antenna, 1710 to 2690 MHz, Integrated RCU

SKU: ANT-TO-00002
 MPN: T0004L3R011

Description

Tongyu's T0004L3R011 is a dual beam dual polarised base station sector antenna, providing 2x2 MIMO in dual-slant polarisation across two beams centred at $\pm 31^\circ$ from boresight. The antenna covers all 4G and 5G cellular bands from 1710 to 2690 MHz, with no band gaps.

30° twin-beam antennas are most commonly used to divide a traditional 65° sector footprint into two sectors that can be fed by two radio units, to achieve a near-doubling of capacity.

The antenna has an integrated and replaceable Remote Control Unit for remote electrical tilt adjustment between 2 and 12°. Performance data are provided as representative values across all tilts and sub-arrays.
