Description

The Telegärtner 4.3-10 straight plug is a high-performance coaxial RF connector, designed for reliable connections in telecommunications and data communications systems. This connector is utilised primarily for attaching 1/2" corrugated cable types, making it ideal for applications requiring robust and stable signal transmission. The screw-type, clamp/clamp design ensures secure and easy installation, facilitating its use in environments where quick and efficient setups are essential.

Constructed with a brass body and copper-silver alloy plating, the connector offers excellent durability and corrosion resistance, ensuring a long service life even in harsh conditions. Its electrical insulator made of Topas COC contributes to superior insulation properties. The connector's capacity to withstand over 100 mating cycles and operate within a wide temperature range of -40 °C to 85 °C makes it suitable for both indoor and outdoor installations.
