

# N Male Four-Hole Flange Connector with Round Post

SKU: N1-4F-RP001

MPN: N1-RP-4F

## Description

N (or N-Type) flange connectors are used within high performance low-band radio communications systems, such as in aerospace, radar, 4G cellular, and broadcast.

This connector is used to terminate coaxial cable types onto a panel where both the inner conductor and outer braid are soldered accordingly. The connector body has a flange design with four mounting holes.

As a low-PIM design the connector uses ternary alloys to achieve very low VSWR under 3 GHz, and a modest  $< 1.3:1$  VSWR up to 6 GHz.

This N Male coaxial connector is used in high performance and general-precision systems up to 6 GHz. Termination of flange connectors particularly those operating towards the upper frequency limit must be made with great care and precision.

## Powertec

Powertec is a wireless technology manufacturer and systems integrator based in Australia. Operating since 1995, Powertec has grown to become the leading wireless technology distributor in its region, and a leading Infratech systems developer. Supporting over 1500 partners the company provides procurement, design, project management, and support services across Australia, New Zealand, Pacific ...

# RF Connector Interface

RF Interface	Body Shape	Mounting
N Male	Straight	4-Hole Flange

## RF Specification

Start Frequency:	0 GHz	Input Impedance:	50
Stop Frequency:	4 GHz	Inner Contact Resistance:	≤ 1 mΩ
		Insulation Resistance:	≥ 5000 mΩ
		Outer Contact Resistance:	≤ 1 mΩ
		RF Operating Voltage:	≤ 500 Vrms

## VSWR Measurement

Frequency	VSWR
4000 MHz	≤ 1.3:1

## Physical Specification

Body Material:	Brass	Conductor Attachment:	Round Post
Body Plating:	Nickel	Contact Material:	Beryllium Copper
Insulator Material:	PTFE / Teflon	Contact Plating:	White Bronze
Dimensions:	27.3 × 25.4 × 25.4	Min. Operating Temperature:	-40 °C
Weight:	44.5 g	Max. Operating Temperature:	85 °C
Compliance/Certifications:	ISO 9001 Quality Management	Mating Cycles:	> 500
RoHS
