GME AE4707B UHF 595mm Fiberglass Radome Antenna, AS002B Spring (2.1dBi) - Black

SKU
ANT-GM-00011
MPN
AE4707B

Description

The AE4700 series is an adaptable antenna system with the coaxial termination embedded within the spring assembly with an easy screw down fitment of the whip. This allows for interchangeability of whips depending on the operating conditions and application, shorter lengths with lower gain for hilly terrain and longer lengths with higher gain for travelling on open roads with flat terrain. These antennas are a popular choice for 4WD enthusiasts hitting tough tracks or rugged touring.

The AE4707B features a 2.1 dBi gain and uses our medium duty barrel spring. This allows fitment of the AW4702B 6.6 dBi whip providing flexibility and options in gain needed when travelling the varying terrain found throughout the Australian outback.

GME

For more than 60 years, GME has been an industry leader in the communication technology space. GME remains a family owned operation and is proudly 100% Australian owned. GME takes immense pride in the quality of its products, they are designed to meet or exceed not only Australian but International CE, FCC and Cospas-Sarsat standards, as required.

Located in Sydney’s west, GME operates from its ...
