## Description

The Peplink IoT 20G is a high-performance antenna designed to enhance connectivity for IoT applications. It supports dual LTE/5G connectivity and a GPS receiver, making it ideal for remote site operations, public safety, and mission-critical communications. Operating within a wide frequency range of 600-6000 MHz, this antenna delivers robust performance across multiple bands. Its 2x2 MIMO configuration ensures improved data throughput and reliability, which is essential for applications requiring stable and fast connections.

The IoT 20G features an IP66-rated enclosure, providing excellent protection against dust and water, making it suitable for outdoor installations. Its polycarbonate construction enhances durability, while the SMA connectors ensure secure and efficient connections. The antenna's peak gain varies across bands, with a maximum of 10.2 dBi, contributing to superior signal strength and coverage.
