

# MARS 4G MIMO Stadium Antenna, 13dBi, 698 to 2700 MHz, N Female

SKU: ANT-MA-00002

MPN: MA-WA82220-DBDP14B

## Description

The MARS 4G MIMO Stadium Antenna (SKU: ANT-MA-00002) is a high-performance panel antenna designed for robust connectivity in demanding environments. Covering frequencies from 698 to 2700 MHz, this dual-polarised antenna is ideal for LTE, WiMAX, cellular, and Wi-Fi systems. With a peak gain of 13 dBi and a low VSWR of <2.0:1, it ensures efficient signal transmission and reception.

Constructed from durable plastic and aluminium, the antenna is IP67 rated, offering excellent protection against dust and water, making it suitable for outdoor use. It operates effectively across a wide temperature range from -55 °C to 65 °C, ensuring reliability in diverse climatic conditions. The antenna's 2x2 MIMO capability and two N Female RF connections provide flexible deployment options for enhanced signal strength and coverage.

MARS Antennas, an ISO9001 and RoHS certified company, brings over 25 years of expertise in antenna design and manufacturing. Known for innovation and quality, MARS Antennas produces solutions that cater to both fixed and mobile applications, supporting a range of communication technologies. This antenna is a testament to MARS's commitment to delivering exceptional performance and durability in all its products.

### MARS Antennas

MARS Antennas & RF Systems is a world class antennas design and manufacturer, RF solutions provider and R&D Company with a proven capacity to design and provide cost effective products with exceptional performance. Since 1994, MARS has been specializing in Outdoor & In-Building Multi Polarized Antennas. MARS subscriber & base station antennas are used in LTE, WiMAX, Cellular, Mobile, MIMO, WLAN ...

# RF Specification

|                   |          |                  |                 |
|-------------------|----------|------------------|-----------------|
| Start Frequency:  | 698 MHz  | Polarisation:    | Dual Pol (V, H) |
| Stop Frequency:   | 2700 MHz | Input Impedance: | 50              |
| Max. Input Power: | 50 W     |                  |                 |

## RF Connectors

| Ports | RF Interface | Body Shape |
|-------|--------------|------------|
| 2     | N Female     | Straight   |

## Frequency Test Data

| Start Freq. | Stop Freq. | Peak Gain | VSWR  | Azimuth | Elevation | F/B Ratio | Inter-Port Iso. |
|-------------|------------|-----------|-------|---------|-----------|-----------|-----------------|
| 698 MHz     | 960 MHz    | 12 dBi    | < 2:1 | 35°     | 35°       | > -22 dB  | > -22 dB        |
| 1700 MHz    | 2700 MHz   | 13 dBi    | < 2:1 | 35°     | 35°       | > -22 dB  | > -37 dB        |

# Physical Specification

|                             |                |                            |                           |
|-----------------------------|----------------|----------------------------|---------------------------|
| Subtype:                    | Panel / Sector | Dimensions:                | 800 x 600 x 110           |
| Input Ports:                | 2              | Ingress Protection:        | IP67                      |
| MIMO:                       | 2x2 MIMO       | Materials:                 | Plastic, Aluminium        |
| Min. Operating Temperature: | -55 °C         | Weight:                    | 6 kg                      |
| Max. Operating Temperature: | 65 °C          | Compliance/Certifications: | RoHS                      |
| PIM, 3rd Order:             | -150 dBc       | Mechanical Compliance:     | IEC 60068-2-11: Salt Mist |
