## Description

The Peplink Mobility 20G is a high-performance cellular antenna designed for robust connectivity in demanding environments. This 2x2 MIMO antenna supports both LTE and 5G networks, ensuring reliable and fast data transmission across a wide frequency range of 600-6000MHz. With its IP68 rating, the device is protected against dust and water, making it ideal for outdoor applications where durability is essential. The inclusion of a GPS antenna with right-hand circular polarisation enhances its utility for navigation and tracking purposes, particularly in mobile healthcare, public safety, and transportation sectors.

The antenna's compact design allows for easy installation on vehicles, buildings, and other structures without the need for a ground plane, facilitating flexible deployment options. Its polycarbonate construction ensures resilience against harsh weather conditions, while the QMA connectors provide secure and efficient RF...
