Description

The Peplink Mobility 40G (Puma 401) is an advanced antenna system designed to enhance mobile connectivity with its robust 4x4 MIMO LTE/5G capabilities. This device is ideal for applications requiring reliable and fast wireless communication, such as in transport, remote site connectivity, and mobile command centres. Its high-performance design supports a wide frequency range from 600 MHz to 6000 MHz, making it suitable for modern cellular networks including 5G. The integrated GPS antenna further enhances its utility for navigation and tracking applications, offering precise positioning data with right-hand circular polarisation and superior gain.

Crafted from durable ABS plastic and polycarbonate, the antenna is built to withstand harsh environments, boasting an IP68 rating for water and dust resistance. This makes it suitable for outdoor installations and challenging operating conditions, withstanding temperatures from -40°C to 80°C...
