Description

The Peplink Mobility 82G is a robust multi-band antenna designed for high-performance connectivity in challenging environments. Supporting 8x LTE/5G MIMO, it enhances cellular signal reception, making it ideal for mobile or remote applications requiring reliable internet access. With a broad frequency range of 600-6000 MHz, it ensures compatibility with various network providers and technologies, including emerging 5G networks. The antenna integrates two WiFi inputs and a GPS module, providing comprehensive wireless and location capabilities for vehicles, maritime, or industrial setups.

Constructed from durable polycarbonate, the Mobility 82G is built to withstand harsh conditions, as evidenced by its IP67 rating and compliance with MIL-STD-810 for environmental durability. This makes it suitable for outdoor installations where exposure to dust and water is a concern. The 8x8 MIMO configuration maximises data throughput and connection...
